Button Nail

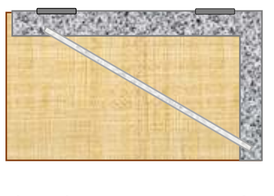
Roofing Nailer (pneumatic)

Coil of Roofing Nails

Sheet Metal Shears (tinsnips)

Shingle Scissors

Utility Knife W/ Hooked Blades



Shingle Cutting Board

Roofing Hammer

## Drywall Tools

Drywall Saw

Drywall Compass

Drywall Nail

Drywall Bit (screw setter)

Drywall Screw

Wide Putty Knife

Drywall Toe Lift

Hole Saws

Drywall Rasp

Drywall Rasp

## Painting Tools

Paint Mixer (for Drill)

Angled Paint Brush

1", 2", & 4" Paint Brush

Paint Cup w/ Magnetic Brush Holder

Paint Roller Pole

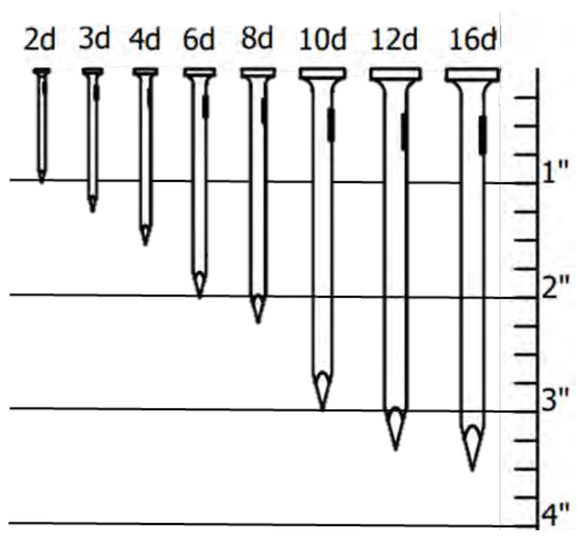
Paint Roller Frame

Paint Roller Cover

Paint Roller Tray

Caulking Gun

## Nails and Screws



**A 10d nail is read as "10 penny"**

Nails are measured in "pennies" because in the 15th century, the term referred to the price of 100 nails – a larger nail would cost more pennies per hundred. The "d" symbol is a shortened form of the Roman coin, the denarius, which became the English penny. While this system originated from price, it eventually became an identifier for length, with longer nails having higher penny numbers, a system that persists in the United States today.
That should be more than you wanted to know.
